

LA DIXMERESSE

Our actions for protect you and us from Covid-19

Valérie and Bruno are ready to welcome you with an even **higher level of quality** and always with **respect for the environment**. Here are the actions and precautions we take **to ensure the health safety of everyone**, before, during and after your stay. To keep the best memory of your stay.

THE SANITATION

- ✦ The rooms are **cleaned and disinfected**, between each stay, with a VAPODIL brand **120°C dry steam cleaner**. And during the lockdown, we cleaned the entire guest houses.
- ✦ The kitchen and common areas are **cleaned daily**. We make sure to disinfect contact points such as door handles, soap and alcohol gel dispenser pumps, and stairwells.
- ✦ The magnetic card in your room is also **disinfected before being put** in a personal envelope.
- ✦ We have installed **disinfectant footbaths** at the entrance of the house for your shoes.

- ✦ In your room during your stay, **we provide a minimum service** to replenish the necessary supplies and in case of dirty damage. We let you order your bed. We recommend a 20 minutes daily aeration taking care to fully open the curtains before maneuvering the window. If you wish, we put at your disposal a cleaning kit with Sutter Ecolabel products.

- ✦ For a stay of one week, we will offer a **complete cleaning of your room** + change of bed linen and bathroom in the middle of your stay.

Dry steam at 120°C and jet power allow for the bactericide, fungicide, levuricide and sporicide efficacy of our VAPODIL system www.vapodil.com . Verified by an independent laboratory report (CLODIA). As these organisms are more temperature resistant than viruses, the virucidal activity of Vapodil is therefore evident (ANSES report).
